TARGET JOB TITLE

My name is Yonela Mangele and I am an aspiring full stack web developer although, for now, my strengths lie mostly on the front-end side of the development. My strongest achievement is successfully completing a 12-month coding course that consists of 6 months of training and 6 months of internship. In that period, I'm proud to say I was a valuable playmaker in group projects because my strong suits are time management and the ability to adapt in any working environment.

EDUCATION

PROFESSIONAL PROJECTS

Capture-Words | Life Choices Coding Academy July 2024 – August 2024
Tasked to complete a project that required 3 weeks of web development using the skills I acquired, and I successfully did so. Capture-Words is the name of the website.

- Mobile-responsive Ecommerce website.
- HTML, CSS, JavaScript, MySQL, Vue.js, Node.js and Bootstrap

YouthForce | LC Studio March 2025 – April 2025
Participated in a group project that required in input of everyone in our class. We distributed the work amongst ourselves fairly and successfully built a functioning social networking website.

- Website full of YouthForce members.
- PHP, WordPress plugins.
